Hi Julie, I understand that there is some extra money available for OT, and that several folks are interested in working during the week. At this time I would suggest chemist work a minimum of 2 hours at a time on weekdays with a max of nine ( 9 ) hours used during the entire week. They could also work 7.5 hours on Saturdays. I would suggest all chemist prep samples, and also allow for use of OT for the MS lab on the weekend, as a backlog in MS will probably develop. With a minimum of 2 hrs at a time Della will be better able to track samples done on OT. I think allowing use of ½ hour or 1 hour of OT at a time is useless. CBS

Julie, Hevis is planning to work several days of OT. She would like to work 2-3 days for comp time, and the others as paid OT. Is this ok? CBS

Peter,  
I don't understand some of these. Can we use the language that was used for the morphine?
